Evolution and Implementation of ISO/IEC 27001:2022 Standard

Fee

500,00 €

Final exam only

Course code

ISO27001_2022_EVC

Test duration

45 min

Passing score

70%

Issued

14/07/2026

Executive summary

The course "Evolution and Implementation of ISO/IEC 27001:2022 Standard" offers a comprehensive and updated insight into the latest version of the standard, emphasizing changes from the 2013 edition, including the 93 controls reorganized in the new Annex A. Aimed at professionals and internal auditors, the program covers integration with relevant Italian regulations such as GDPR, Legislative Decree 231/01, and AGID directives. It also presents risk management methodologies aligned with ISO 31000 and the PDCA model principles applied to the Information Security Management System (ISMS). Competencies are assessed through a 45-minute final test with a 70% passing threshold, ensuring a rigorous validation process that leads to a participation certificate. This training pathway supports internal auditors effectively in the implementation and compliance management of information security.

Certification process

- Registration or login to the Academy platform.
- Completion of the final course examination only. Any training or preparation may be completed externally or through other channels.
- The test questions refer to the objectives, skills and topics described in this technical sheet.
- Assessment of the result, possible validation and certificate issuance according to the rules applicable to the course.

Important note

On Academy, candidates take only the final course examination. Any training or preparation activity may be delivered externally or through other channels. The test questions refer to the topics described in this technical sheet and in the course syllabus summary.

Syllabus summary

The course is based on the updated requirements and clauses of ISO/IEC 27001:2022 standard, including a comparative analysis with ISO/IEC 27001:2013, the new Annex A comprising 93 controls grouped into four macro-categories, and integration of Italian legislation such as GDPR, Legislative Decree 231/01, and AGID directives. It also covers risk management methodologies aligned with ISO 31000 and PDCA principles for the Information Security Management System (ISMS).
