Executive summary

The "Auditor/Lead Auditor ISO 31000 (Risk Management)" course is designed to train professionals skilled in conducting effective audits according to the ISO 31000 standard, focused on risk management. Participants will develop competencies in identifying, assessing, and controlling risks within organizations across various sectors, with special emphasis on leadership and commitment in risk governance. Through practical case studies based on real-life situations such as regulatory changes, technical failures, and critical supplier management, learners will learn to design and implement robust risk management frameworks compliant with ISO 31000. The course also provides an introduction to applying ISO 19011 guidelines for auditing integrated management systems. The teaching methodology includes theoretical lessons, practical exercises, and an audit simulation, delivering a comprehensive and targeted learning experience. Upon completion, participants will be able to perform effective risk audits, enhancing organizational resilience and supporting strategic decisions based on risk management.

Certification process

- Registration or login to the Academy platform.
- Completion of the final course examination only. Any training or preparation may be completed externally or through other channels.
- The test questions refer to the objectives, skills and topics described in this technical sheet.
- Assessment of the result, possible validation and certificate issuance according to the rules applicable to the course.

Important note

On Academy, candidates take only the final course examination. Any training or preparation activity may be delivered externally or through other channels. The test questions refer to the topics described in this technical sheet and in the course syllabus summary.
