TECHNICAL LEARNING AND ASSESSMENT DOSSIER

Auditor/Lead Auditor ISO 14001 + Carbon/GHG (Environment + Climate)

Price / certificate issuance
99,00 €
VAT excluded

Course code	Minimum duration	Final pass score	Dossier issue
ISO14001_GHG_LA	75 min	70%	28/11/2026

1. Course identity, purpose and scope

The course "Auditor/Lead Auditor ISO 14001 + Carbon/GHG (Environment + Climate)" is designed to train professionals capable of conducting audits in environmental management and greenhouse gas emissions reporting. Integrating ISO 14001:2015 with ISO 14064 standards (for GHG emissions verification) and the ISO 19011 auditing guidelines, the program prepares participants to assess regulatory compliance, identify and evaluate environmental and climate aspects, and verify the effectiveness of integrated management systems. Special focus is placed on managing carbon emissions across the value chain, operational control, staff competence, and internal and external communication. Reliable calculation methodologies, data quality management, and integration of climate risk into decision-making processes are also covered. The course targets internal auditors, lead auditors, and professionals involved in environmental and climate verification seeking verified skills to conduct comprehensive, integrated audits according to current ISO standards.

This extended technical dossier describes the pathway as published in CIWZ Academy on the issue date. It consolidates purpose, references, learning architecture, module contents, assessment system, passing criteria and certificate conditions. It does not replace the official texts of the standards, laws, guidelines or schemes referenced.

2. Normative, regulatory and technical references

ISO 14001:2015; ISO 14064-1; ISO 14064-3; ISO 19011; ISO/IEC 17021-1

References are used as the learning and assessment framework within the limits of published content and available sources. For professional application, the official and current versions of the referenced documents always prevail.

3. Learning architecture and assessment system

- minimum tracked time: 75 min
- active final-exam bank: 200 questions

- final exam: 30 questions selected from the bank
- passing threshold: 70%
- Direct access to the final assessment under the published rules for the exam-only pathway.
- Exam assembly from the active course bank and scoring against the published pass threshold.
- Recording of the result and, where applicable, request for the final certificate.

4. Official catalogue technical information

Learning Objectives

- Equip participants to conduct audits based on ISO 14001 integrated with GHG emissions reporting following ISO 14064
- Deepen understanding of environmental and climate regulatory compliance verification
- Develop skills in operational control and carbon emission data quality management

Acquired Skills

- Planning and executing environmental and GHG reporting audits
- Analysis of climate risk management within environmental management systems
- Verification of internal and external communications related to emissions and decarbonization goals

Target Audience

- Internal and lead auditors
- Environmental and climate management system managers
- Consultants and professionals in environment and sustainability sectors

Prerequisites

- Basic knowledge of ISO 14001 standards and environmental management principles
- Experience in environmental audits or emission monitoring systems

Course Content

- ISO 14001:2015 and ISO 14064 (parts 1 and 3) standards
- Audit principles and methods per ISO 19011 and ISO/IEC 17021-1
- Scope 1, 2, and 3 emissions and value chain management
- Operational control and GHG data quality
- Climate risk management and communication in EMS context

Teaching Methodology

- Lectures with practical examples and case studies
- Analysis of sample audit questions
- Interactive discussions and verification simulations

Assessment Method

- Final multiple-choice test
- Passing threshold: 70%

Duration

- 75 minutes

Certification

- Certificate of passing (additional fee applicable)

Expected Outcomes

- Ability to perform comprehensive integrated EMS+GHG audits compliant with standards
- Improved identification of climate risks and opportunities within organizations

7. Assessment system, final exam and passing criteria

- The final assessment consists of 30 questions selected from the active course bank. The platform applies an anti-repetition logic for new attempts when the bank size allows it.
- Final question-bank size detected at generation time: 200 active questions.
- Published passing threshold for the course: 70%.
- Questions are intended to assess not only recall but also interpretation, application, evidence selection, scenario assessment and quality of decision-making, depending on the subject matter.

8. Tracking, learning continuity and session integrity

- Path status, completed modules and recorded time are managed server-side when the course uses the Academy learning mode.
- The platform allows the pathway to resume from the recorded point and retains the results of required checks.
- Assessment sessions may be subject to the integrity and proctoring controls enabled by the platform and described in the applicable usage rules.
- Technical and integrity events support assessment and do not replace professional judgement where human review is required.

9. Certificate, use and limitations

The CIWZ certificate, where provided by the pathway and requested after passing, records the result achieved in the stated CIWZ pathway or assessment. It does not automatically replace personnel certification, professional registration, statutory licence, legal qualification or credentials issued by third-party bodies where such requirements are imposed by the applicable scheme.

10. Commercial and tax conditions

- Price / certificate issuance: 99,00 € VAT excluded.
- UAE VAT is applied to UAE customers according to billing data and the applicable tax rules.
- Any specific commercial terms, agreements or corporate orders override the public price only when formally accepted by Certificato IWZ FZCO.

11. Dossier document control

- Document automatically generated by CIWZ Academy from the course data published at the time of the request.
- Course code: ISO14001_GHG_LA
- Document language: EN

- Generation date: 28/11/2026
- For normative and professional application, the current official sources and any applicable procedures/schemes prevail.
