## Executive summary

The course "Auditor/Lead Auditor ISO 14001 + Carbon/GHG (Environment + Climate)" is designed to train professionals capable of conducting audits in environmental management and greenhouse gas emissions reporting. Integrating ISO 14001:2015 with ISO 14064 standards (for GHG emissions verification) and the ISO 19011 auditing guidelines, the program prepares participants to assess regulatory compliance, identify and evaluate environmental and climate aspects, and verify the effectiveness of integrated management systems. Special focus is placed on managing carbon emissions across the value chain, operational control, staff competence, and internal and external communication. Reliable calculation methodologies, data quality management, and integration of climate risk into decision-making processes are also covered. The course targets internal auditors, lead auditors, and professionals involved in environmental and climate verification seeking verified skills to conduct comprehensive, integrated audits according to current ISO standards.

## Certification process

- Registration or login to the Academy platform.
- Completion of the final course examination only. Any training or preparation may be completed externally or through other channels.
- The test questions refer to the objectives, skills and topics described in this technical sheet.
- Assessment of the result, possible validation and certificate issuance according to the rules applicable to the course.

## Important note

On Academy, candidates take only the final course examination. Any training or preparation activity may be delivered externally or through other channels. The test questions refer to the topics described in this technical sheet and in the course syllabus summary.

## Syllabus summary

ISO 14001:2015; ISO 14064-1; ISO 14064-3; ISO 19011; ISO/IEC 17021-1

## Learning Objectives

- Equip participants to conduct audits based on ISO 14001 integrated with GHG emissions reporting following ISO 14064
- Deepen understanding of environmental and climate regulatory compliance verification
- Develop skills in operational control and carbon emission data quality management

Auditor/Lead Auditor ISO 14001 + Carbon/GHG  
(Environment + Climate)

**Acquired Skills**

- Planning and executing environmental and GHG reporting audits
- Analysis of climate risk management within environmental management systems
- Verification of internal and external communications related to emissions and decarbonization goals

**Target Audience**

- Internal and lead auditors
- Environmental and climate management system managers
- Consultants and professionals in environment and sustainability sectors

**Prerequisites**

- Basic knowledge of ISO 14001 standards and environmental management principles
- Experience in environmental audits or emission monitoring systems

**Course Content**

- ISO 14001:2015 and ISO 14064 (parts 1 and 3) standards
- Audit principles and methods per ISO 19011 and ISO/IEC 17021-1
- Scope 1, 2, and 3 emissions and value chain management
- Operational control and GHG data quality
- Climate risk management and communication in EMS context

**Teaching Methodology**

- Lectures with practical examples and case studies
- Analysis of sample audit questions
- Interactive discussions and verification simulations

**Assessment Method**

- Final multiple-choice test
- Passing threshold: 70%

**Duration**

- 75 minutes

**Certification**

- Certificate of passing (additional fee applicable)

**Expected Outcomes**

- Ability to perform comprehensive integrated EMS+GHG audits compliant with standards

- Improved identification of climate risks and opportunities within organizations
