## Executive summary

The "ISO 45001:2018 Auditor/Lead Auditor" course is designed to train professionals capable of conducting effective audits of Occupational Health and Safety Management Systems (OHSMS) compliant with the ISO 45001:2018 standard. Through a theory-practice approach, participants gain skills in risk identification, legal compliance verification, and assessment of preventive measures implemented within organizations. The course covers the principles and normative requirements, methodologies for conducting internal and external audits, and processes related to change management and worker participation in safety. It also examines auditing guidelines per ISO 19011 and certification body requirements outlined in ISO/IEC 17021-1. This course is intended for auditors, lead auditors, and safety professionals seeking to enhance their expertise in occupational health and safety evaluation. Upon completion, participants will be able to plan, conduct, report, and follow up on audits in accordance with international standards, thereby supporting the continual improvement of OHSMS in organizations.

## Certification process

- Registration or login to the Academy platform.
- Completion of the final course examination only. Any training or preparation may be completed externally or through other channels.
- The test questions refer to the objectives, skills and topics described in this technical sheet.
- Assessment of the result, possible validation and certificate issuance according to the rules applicable to the course.

## Important note

On Academy, candidates take only the final course examination. Any training or preparation activity may be delivered externally or through other channels. The test questions refer to the topics described in this technical sheet and in the course syllabus summary.

## Syllabus summary

ISO 45001:2018; ISO 19011; ISO/IEC 17021-1
