Executive summary

The "Training & Awareness Manager – Course (Cybersecurity Educator/Trainer)" focuses on developing and managing cybersecurity training and awareness programs crucial to reducing human-related information security risks. Targeted at professionals responsible for building skills and awareness within organizations, it covers regulations and best practices related to competencies, metrics, and change management in cybersecurity. The training includes analysis of real-world cases, blended learning tools, and innovative methods such as gamification and nudging to enhance training effectiveness without causing fatigue. Strategies to create inclusive and accessible environments following recognized standards are also explored, alongside cultural approaches like Just Culture to support continuous security improvement. Through targeted assessments, participants gain the capabilities to design, implement, and evaluate training programs tailored to diverse business contexts, from manufacturing SMEs to SaaS and financial sectors, helping to mitigate cyber risk through structured and aware human management.

Certification process

- Registration or login to the Academy platform.
- Completion of the final course examination only. Any training or preparation may be completed externally or through other channels.
- The test questions refer to the objectives, skills and topics described in this technical sheet.
- Assessment of the result, possible validation and certificate issuance according to the rules applicable to the course.

Important note

On Academy, candidates take only the final course examination. Any training or preparation activity may be delivered externally or through other channels. The test questions refer to the topics described in this technical sheet and in the course syllabus summary.

Syllabus summary

ISO/IEC 27001 and ISO/IEC 27002 (competence, awareness & training) + ISO/IEC 27004 (metrics) + NIST Cybersecurity Framework (Awareness and Training) + security awareness and change management best practices

Learning Objectives

- Provide in-depth knowledge on cybersecurity training and awareness methodologies
- Apply best practices and international standards for awareness management

Certification Bodies Management systems

IFZA Business Park - Building A2 - Nadd Hessa - Dubai Silicon Oasis
United Arab Emirates
Phone: +971 502475030

Training & Awareness Manager – Course (Cybersecurity Educator/Trainer)

- Evaluate and enhance cybersecurity awareness programs using metrics and feedback

Skills Acquired

- Design of blended learning training programs
- Implementation of gamification and nudging strategies
- Management of cultural approaches such as Just Culture for security
- Analysis of specific needs across various sectors

Target Audience

- Corporate training professionals
- Cybersecurity and compliance managers
- IT consultants and auditors

Prerequisites

- Basic knowledge of information security
- Prior experience in training or human resource management recommended

Program

- ISO/IEC and NIST frameworks and regulations
- Training methodologies and instructional techniques
- Tools for measuring effectiveness and metrics
- Case studies and simulations

Teaching Methodology

Lectures, practical exercises, real case studies, multimedia support, and interactive sessions.

Assessment Method

Multiple-choice test with a passing score of 70%.

Duration

60 minutes

Certification

Completion certificate available for an additional fee.

Expected Outcomes

Ability to design and manage training programs that enhance organizational security and reduce human risk in cybersecurity.
