## Executive summary

The "Insider Threat Analyst Support – Training Course" is designed to offer specialized assistance to analysts handling internal threats within organizations. The course takes a focused approach covering identification, analysis, and management of insider threats across diverse operational contexts such as consulting firms, hospitals, SaaS companies, manufacturing groups, and retailers. Best practices are explored, including access controls, UEBA-based monitoring, auditing, and privileged account management, aligned with international standards like ISO/IEC 27001, ISO/IEC 27002, and NIST SP 800-53. The curriculum incorporates complex case studies to build capabilities in support of detection, investigation, offboarding, and privacy management phases, targeting professionals in IT security and compliance. Participants gain skills to apply objective evidence and proportionate measures to reduce internal risks, enhancing corporate security governance.

## Certification process

- Registration or login to the Academy platform.
- Completion of the final course examination only. Any training or preparation may be completed externally or through other channels.
- The test questions refer to the objectives, skills and topics described in this technical sheet.
- Assessment of the result, possible validation and certificate issuance according to the rules applicable to the course.

## Important note

On Academy, candidates take only the final course examination. Any training or preparation activity may be delivered externally or through other channels. The test questions refer to the topics described in this technical sheet and in the course syllabus summary.

## Syllabus summary

ISO/IEC 27001 and ISO/IEC 27002 (access controls, logging, HR security) + UEBA and monitoring principles + NIST SP 800-53 (auditing and account management controls) + detection, investigations, privileged access management and privacy safeguards best practices

## Training Objectives

- Understand the support role for insider threat analysts
- Apply controls and best practices for identifying and managing internal threats
- Manage objective evidence in complex operational scenarios
