## Executive summary

The course "Internal Auditor for Quality Management System – Aerospace, Space and Defence (ASD-STAN EN 9100:2018)" is designed to train professionals capable of effectively conducting internal audits within organizations operating in the aerospace, space, and defence sectors. Based on the ASD-STAN EN 9100:2018 standard, which integrates ISO 9001:2015 requirements with sector-specific additions, the program provides in-depth skills to assess the conformity and effectiveness of the Quality Management System. The course covers audit principles and techniques in accordance with ISO 19011:2018, with a particular focus on planning, checklist use, evidence management, and handling findings and corrective actions (CAPA). Its concise duration supports focused and targeted learning, ideal for professionals already active in the field or seeking quick specialization. Upon completion, participants are able to organize and execute internal audits, contributing to continuous improvement and compliance within their organizations in the aerospace sector.

## Certification process

- Registration or login to the Academy platform.
- Completion of the final course examination only. Any training or preparation may be completed externally or through other channels.
- The test questions refer to the objectives, skills and topics described in this technical sheet.
- Assessment of the result, possible validation and certificate issuance according to the rules applicable to the course.

## Important note

On Academy, candidates take only the final course examination. Any training or preparation activity may be delivered externally or through other channels. The test questions refer to the topics described in this technical sheet and in the course syllabus summary.

## Syllabus summary

ASD-STAN EN 9100:2018 (aerospace QMS, based on ISO 9001:2015 with additional requirements) + ISO 19011:2018 (guidelines for auditing management systems) + internal audit principles and techniques: planning, checklists, evidence handling, findings and corrective actions (CAPA)

## Learning Objectives

To train competent internal auditors according to ASD-STAN EN 9100:2018, able to conduct quality system audits in aerospace, space, and defence sectors.

Internal Auditor for Quality Management System –  
Aerospace, Space and Defence (ASD-STAN EN 9100:2018)

**Skills Acquired**

- Knowledge of ASD-STAN EN 9100:2018 standard and additional requirements.
- Application of ISO 19011:2018 guidelines for audits.
- Planning and conducting internal audits.
- Managing evidence, findings, and corrective actions (CAPA).

**Target Audience**

Professionals working or intending to work as internal auditors in aerospace, space, or defence companies.

**Prerequisites**

Basic knowledge of Quality Management Systems and interest in ASD-STAN EN 9100:2018 standards.

**Program**

- Introduction to ASD-STAN EN 9100:2018 standard.
- Audit principles and techniques per ISO 19011:2018.
- Audit planning and checklist preparation.
- Collection and management of evidence and findings.
- Managing corrective actions and continuous improvement.

**Teaching Methodology**

Theoretical lessons complemented with practical examples and audit simulations.

**Evaluation Method**

Final test with a 70% passing score required for certificate issuance.

**Duration**

45 minutes.

**Certification**

Certificate of completion as internal auditor ASD-STAN EN 9100:2018.

**Expected Outcomes**

Ability to plan and conduct internal audits compliant with aerospace standards, supporting company quality system improvement.
